PROFILE

A dedicated and goal-oriented individual seeking to contribute to a dynamic organization by aligning with its vision and mission. Committed to delivering results through individual effort and effective team collaboration, with a strong sense of responsibility and continuous learning.

INTERNSHIP EXPERIENCE

06/2023 – 05/2025
Hyderabad

Makeskilled
IoT Developer

- Designed, developed, and deployed end-to-end web applications using **Python (Flask)** ensuring optimal performance and user experience.
- Engineered interactive UIs using **HTML** and **CSS**, with full integration into backend services and **MySQL, MongoDB** databases.
- Integrated **blockchain concepts** (e.g., smart contracts, decentralized applications) into educational and demo platforms.
- Mentored project teams through ideation, version control (**Git/GitHub**), and deployment best practices
- Delivered sessions on **AI integration**, **cloud deployment**, and **security-first development** practices to prepare learners for industry readiness.

EDUCATION

2019 – 2023
Guntur

B.Tech(CSE)
Chalapathi Institute of Engineering and Technology
CGPA - 6.79

2017 – 2019
Guntur

Intermidiate(MPC)
Narayana Junior College
CGPA - 9.4

2016 – 2017
Koyavaripalem

SSC
Z.P.H.School
CGPA - 8.7

SKILLS

Languages & Frameworks
Python, Node.js, Flask, React.js, HTML, CSS,JAVA, Spring Boot

Databases
MySQL, MongoDB

Cloud & DevOps
AWS, GCP, AWS IoT, Git, GitHub, Jira

Emerging Tech
Blockchain, Web3, Smart Contracts, AI , ML , Deep Learning, Computer Vision, OpenCV

CERTIFICATES

- Architecting with Google Compute Engine
- AWS Academy Cloud Foundations

PROJECTS

Farm Tools Rental & Marketplace Web Application
Technologies: Python, Flask, SQLite, Bootstrap, HTML/CSS, JavaScript, Flask-Mail, Font Awesome
Developed a full-stack web application that enables farmers to rent or sell agricultural tools, connecting tool owners with those in need to improve cost-efficiency and resource sharing in rural areas.
Key Features:

- Implemented **user registration and login system** with secure authentication.
- Designed tool listing functionality with **detailed specifications, images**, and categorized browsing.
- Enabled **rental and purchase requests** with email alerts via **Flask-Mail**.
- Developed a **responsive interface** using Bootstrap and custom CSS for accessibility across devices.
- Added **search and filtering** by tool categories (e.g., tractors, seeders, irrigation, etc.).
- Integrated **tool maintenance tracking** and history view for users.
- Configured environment management using .env for email and database settings.
- Used **SQLite** for lightweight and efficient local data storage.

News Portal Web Application
Technologies: Java, Spring Boot, MySQL, Thymeleaf, Bootstrap, JavaMail
Developed a dynamic web-based news portal with role-based access for users, employees, and administrators. Integrated job application workflows, news publishing, and email notifications. **Key Features:**

- Implemented **user registration/login**, role management, and secure access to user-specific dashboards.
- Enabled **employees to upload news**, manage job applications, and view detailed applicant data.
- Built **admin dashboard** to approve/reject applications and manage employee data.
- Integrated **email notifications** for registration, application updates, and status alerts using JavaMail.
- Structured code using **MVC architecture** with controllers, services, and repository layers.
- Managed data using **MySQL** and connected views through **Thymeleaf templates**.
